Food Combinations

Meat and What to Serve With It

EVERY housewife is interested in providing her family with an adequate diet. The meals for the day must furnish enough protein, carbohydrates or sugars and starches, fats, minerals, and vitamins to supply the needs of the body. It is quite simple to plan a balanced diet if at least one food from each group is included in the daily meals. It is not necessary that each meal contain all the essential food constituents but, if one meal is deficient in protein or starch or other class of foods, this deficiency should be made up at one of the other meals. If the meals for the day contain enough of each essential food constituent, the diet will be properly balanced.

Since nearly all meals are built around meat, the housewife wants to know what foods she should serve with it in order to have a balanced meal.

Meat is one of the best sources of protein; therefore, when meat is served, the housewife knows that this requirement is met.

Meat furnishes energy; the fatter meat furnishes more energy than lean meat; lean meat furnishes more protein.

Meat is a source of minerals, being especially rich in iron and phosphorus.

Meat is a source of some vitamins, especially the glandular organs, which are rich in these vital food factors.

Meat is a very easily and completely digested food; therefore, foods which furnish roughage must be served with it. Fruits and green vegetables supply roughage as well as valuable minerals and vitamins and these serve as body regulators.

Green vegetables and milk are necessary to make certain an adequate supply of calcium. The diet of growing children especially should contain these foods for the sake of strong well-formed teeth and bones.

If the meal is so planned that it is composed of meat, a starchy food, such as potatoes or rice, a green vegetable, and a fresh vegetable or fruit salad, it will furnish an adequate supply of the necessary foods. Fresh fruits and vegetables should be included as frequently as possible for their vitamins and minerals.

The question of what vegetables and accompaniments make the best combinations with the different kinds and cuts of meat is one that the housewife often finds troublesome. While there are no hard and fast rules, it is true that certain combinations of meat and vegetables are particularly fitting.

The purpose of this booklet is to answer that question at a glance. With the addition of a green salad and a dessert, the suggestions given for dishes to serve with each meat dish will make a complete and well-balanced meal.

Beef Cuts and Their Uses

Description	Cut	Characteristics of Cut	Uses	Extra Edible Parts and How Prepared
The flesh of beef is light cherry red in color. The lean is fine grained and "velvety" in appearance. It should be well marbled with fat. The fat is firm and creamy white. The character and distribution of fat is an indication of quality in beef. Bones should be porous and pinkish rather than flinty white.	Neck	Juicy and well-flavored	Soups, stews, mince meat	Heart— Roasted, stewed, braised
	Chuck	Good quality, muscles do not run in one direction	Roast (5th rib), steaks, pot-roasts, stews, cooking in water.	
	Rib	Rich flavor, very tender, easy to carve	Roasts, steaks	Kidney— Broiled, stewed, fried
	Plate Plate Brisket Short ribs	Lean and fat in layers Fat sweet and good for boiling	Plate and brisket—(boned and rolled; fresh or corned) stews, pot-roasts, cooking in water	Liver— Fried, baked, meat pie
	Fore shank	Bone and gristle, varying amounts of lean	Short ribs—braising, cooking in water	
	Round	Tender, well flavored, little waste	Soup, stews, ground meat	Tongue— Corned, smoked, pickled, boiled
	Rump	Juicy meat, good quality	Steaks, pot-roasts, roasts, Swiss steaks	
	Hind shank	Bone and gristle, varying amounts of lean	Pot-roasts, steaks, corn-ing	Tripe— Pickled, creamed, breaded
	Loin	Tender, juicy, sirloin and porterhouse steaks	Soups, stews, ground meat	
	Flank	Boneless steak from flank, muscles run lengthwise	Steaks, roasts	Oxtail— Soup, boiled, braised
			Stuffed steak, steaks, flank steak filets	

Time-table for Cooking Beef

Cut	Broiled or Panbroiled	Roasted or Baked	Cooked in Water	Braised
Ribs				
Rare		Sear 20-30 min., at 500° F., then cook at 300° F., to internal temperature of 140° F., about 16 min., per pound	Meat should not be boiled but should be cooked below boiling point, or simmered	
Medium		Same as for rare except cook to internal temperature of 160° F., or 22 min., per pound		
Well-done		Same except cook to 180° F., or about 30 min., per pound		
Rump, Round, Chuck		Same as for ribs	30 min. per pound	45 min.-1 hr. per pound
Short ribs		18-20 min. per pound	15-20 min. per pound	30-40 min. per pound
Filet	20 min.	20-30 min.		20-30 min.
Steak				
1 in. thick	8-10 min.			
1½ in. thick	10-15 min.			
2 in. thick	18-25 min.

Pressed veal	Creamed potatoes	Spinach Peas Asparagus	Hard-cooked eggs
Breast of veal	Brown potatoes	Peas Corn String beans	Tart jelly Bread dressing
Sweetbreads	French fried potatoes Creamed potatoes	Green peas Mushrooms	Tomato sauce
Brains	French fried potatoes Au gratin potatoes	Sliced tomatoes	Mushroom sauce Sour sauce Dutch sauce Tomato sauce

Veal Cuts and Their Uses

Description	Cut	Characteristics of Cut	Uses	Extra Edible Parts and How Prepared
<p>Veal is almost white in color with a delicate pinkish tinge.</p> <p>The flesh is not so firm as that of beef.</p> <p>The fat is white with slight pinkish tint and firm.</p>	Leg	Solid meat of good quality; very little waste	Roasts, steaks (called cutlets)	Heart— Baked, stewed, braised
	Rump	High quality	Roasts	Brains— Fried, creamed, scrambled
	Loin	Excellent quality	Chops, roasts	Kidney— Broiled, stewed, meat pie, fried
	Rib	Excellent quality	Chops, roasts	Liver— Fried, baked, braised
	Breast	Good quality	Roasts, stews	Tongue— Corned, smoked, boiled
	Shoulder	Solid meat of good quality	Roasts, stews	Sweetbreads— Creamed, braised, broiled, salad
	Shanks	Fore and hind shanks, bone and gristle—little meat	Stews, soup, veal loaf	
	Chuck Includes the shoulder, breast and neck	Meat of good quality	Roasts, steaks	

Time-table for Cooking Veal

Cut	Broiled or Panbroiled	Roasted or Baked	Cooked in Water	Braised
Loin	<p>Veal contains little fat and needs long, slow cooking, therefore broiling or panbroiling is not recommended as a method of cooking any veal cut. Braising is the usual way of preparing veal chops and cutlets.</p>	<p>Sear 15 min. at 500° F., then at 260° F., to internal temperature of 160° F.,* about 23 min. per pound.</p>	<p>Veal is not cooked in water because this meat contains little extractives and so does not have enough flavor for this method.</p>	
Shoulder		Same as for loin		
Leg		Same as for loin		
Cutlets				40-50 min.
Chops				20-25 min.

* A meat thermometer removes the guesswork from roasting.

An oven regulator insures more uniform and exact results.

Slow oven is 250°-350° F.; moderate oven is 350°-400° F.; hot oven is 400°-450° F.; very hot oven is 500°-550° F.

Pork Cuts and Their Uses

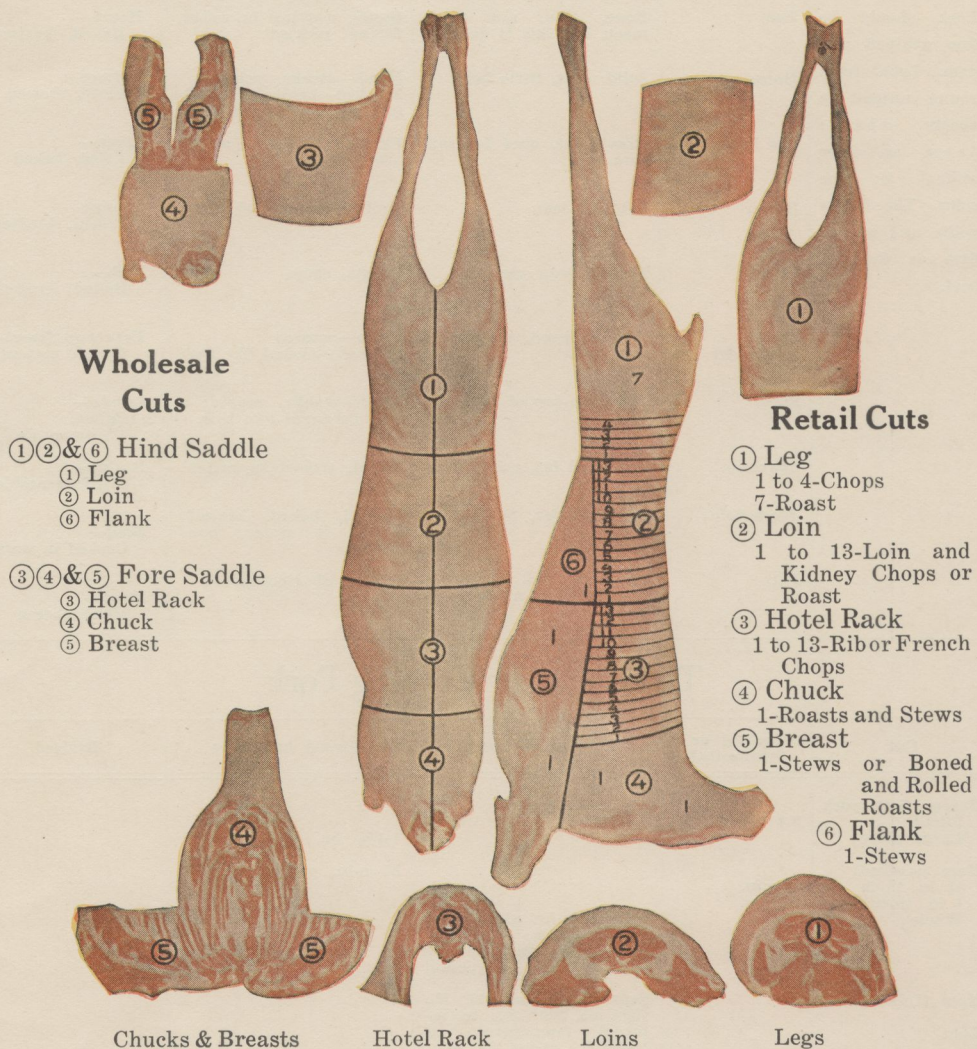

Description	Cut	Characteristics of Cut	Uses	Extra Edible Parts and How Prepared
Pork should be fine grained and firm. Lean from young animal is nearly white; from an older animal is rose color. The fat is white and not so firm as that of beef.	Feet	Bone, skin, not much meat, but this is delicate	Stews, cooking in water, frying, pickled	Heart— Baked, braised
	Hams	Solid meat, little bone	Fresh—steaks, roasts Smoked—baking, broiling, cooking in water	Kidney— Fried, stewed
	Fat back	Mostly fat, used for salt pork	Fried, combined with other foods	Liver— Fried, baked
	Bacon	Fat and lean	Broiled, panbroiled	Tongue— Boiled, braised
	Loins	Tender, lean meat	Roasts, chops	Tail— Boiled, braised
	Picnic shoulder	Well flavored, mostly lean meat	Fresh—roasted Smoked—cooked like ham	Ears and Snout— Boiled, stewed
	Butts	Cut from top of shoulder	Fresh—steaks, roasts May be cured like ham	Lungs— Baked, en casserole
	Spareribs	Lean and fat, good flavor	Baked, cooked in water	Brains— Fried, scrambled
	Tenderloin	Lean, tender, no bone	Broiled, baked, braised, cooked in water, pan-broiled	Jowl— Cooked in water
	Fat	One-tenth to one-third hog carcass made into lard	Frying, shortening	Head— Head cheese

Time-table for Cooking Pork

Braised neck slices	Boiled rice	Creamed carrots Stewed tomatoes	Caper sauce Curry sauce
Stew	Boiled potatoes Dumplings	Turnips Parsnips Onions Carrots Peas	Tart jelly

Lamb and Mutton Cuts and Their Uses

Description	Cut	Characteristics of Cut	Uses	Extra Edible Parts and How Prepared
(Lamb) Flesh is light pink, deepening in color as it ages. Lean is firm and fine grained. Fat is white, hard, and flaky.	Leg	Solid meat, fine quality	Roasts, cooked in water; steaks may be cut from leg	Heart— Baked, braised, stewed
	Loin	Excellent quality	Chops, roasts	Brains— Creamed, braised, scrambled
	Rack	Meat of fine quality	Chops, roasts, crown roast	Kidney— Fried, stewed, broiled
(Mutton) Dull brick red in color. Lean is firm and fine grained. Fat is hard, white and flaky.	Shoulder or chuck	Well-flavored, tender meat	Stews, roasts, pot-roasts, chops	Liver— Fried, baked, braised
	Breast (including flank)	Meat not so fine grained as leg or loin	Stews, roasts—boned and stuffed	Tongue— Cooked in water, braised

The break-joint distinguishes lambs and yearlings from mature sheep. The break-joint is a temporary cartilage at the head of the shank just above the ankle. In dressing lambs and some yearlings the foot can be broken off at this point, giving the end of the shank a saw-tooth appearance. In lambs the broken surface is smooth, moist and red; in yearlings it becomes more porous, dry, and less red in color. The shank of mature sheep will not break and the foot is taken off at the ankle instead, making a "round joint."

Time-table for Cooking Lamb and Mutton

Cut	Broiled or Panbroiled	Roasted or Baked	Cooked in Water	Braised
Leg, Breast, Shoulder		(Lamb) Sear 30 min. at 480° F., then at 300° F., to internal temperature 175° F. (rare), 182° F. (well done), about 30 min. per pound. (Mutton) Same as lamb. Mutton is sometimes eaten rare, in which case less time would be required.	(Lamb) 12-15 min. per pound + 10 min. (Mutton) 15-20 min. per pound + 20 min.	3-3½ hrs. 3-3½ hrs.
Loin		(Lamb) Sear 30 min. at 480° F., then at 300° F., to internal temperature 175° F. (rare), 182° F. (well done), about 30 min. per pound.		
Chops, steak	(Lamb) 10-15 min., double thickness 25-30 min.	(Mutton) Same as lamb.	Meat should not be boiled but should be cooked below the boiling point or simmered.	
Neck				(Lamb and Mutton) 20-25 min. per pound.
Crown Roast		(Lamb) 1¼ hr.
